

Who is Bactronix?

Bactronix is a science based microbial control company that helps to create healthier environments using our eco-responsible products.

The exclusive Two-Step Bactronizing™ Process is applied with an advanced electrostatic delivery system. The Two-Step process will eliminate bacteria, viruses, mold and odor.

Sick Home Syndrome

“Sick Building Syndrome,” commonly referred to as SBS, affects a large majority of homes in the US. Most homeowners or home occupants do not realize their home is causing their prolonged, or sometimes chronic illnesses.

“Sick Home Syndrome” Can Result In:

- Headaches, Dizziness, Nausea
- Ear, Nose or Throat Irritation
- Dry/Itchy Skin (Rashes)
- Allergies/Asthma
- Fever
- Breathing/Respiratory Problems
- Equilibrium Problems
- Tremors
- Pulmonary Hemorrhage

Fighting the “Sick Home Syndrome”

5.0  Rating on Google:

“I was pleased with the service and the professionalism I experienced with Bactronix.”
- Casey Purcell

“I had a mold condition in one of my buildings and Bactronix protected my tenants!”
- Lou Essey

Bactronix has Engineered a Process to Fight Against the "Sick Home Syndrome"

The Bactronizing Seal of Certification is a Symbol of Health and Safety

Mold and Mold Spores

Mold and mold spores can occur in the areas where moisture and ventilation problems develop. Mold not only compromises the structural integrity of a home, it can also cause long-term health illnesses.

As shown in the diagram below, bacteria, mold, mildew and odor problems can develop from pre-existing conditions in the home.

Pet Odors

Pet odors are part of the home's "biological footprint." The Bactronizing Process eliminates pet odors and other unpleasant smells that develop over time. Our nanotechnology breaks down VOCs, providing a safer and fresher smelling home environment.

We Treat Cigarette and Cigar Odors!

Bacteria and Viruses

During cold/flu seasons viruses such as Coronavirus and H1N1, can be spread through cross-contamination in homes on high touch points and even the air we breathe.

Our Two-Step Bactronizing Process reduces and controls bacteria and viruses to help improve environmental safety.

Bactronix Bionomic Specialists will conduct an evaluation with advanced testing to measure the levels of contamination and provide recommendations for proper treatment. The Bactronizing Process will improve the quality of your home by providing a safer and healthier environment to live.
